Contents: Commuter-Bag Urban with QL3.1 mounting system

Attention: Remove or stow away shoulder strap prior to biking

Optional accessories: QL3.1 mounting brackets for racks with diameter 11 to 16 mm (No. E191), QL3.1 mounting set (No. E201)

Attention: Maximum load per pannier is 9kg / 20 lbs. We recommend weighing each loaded pannier to confirm that the maximum allowance of the pannier fixation is not exceeded. This practice is advised for both rear and front panniers. CAUTION: The maximum weight capacity of every carrier model is different. Please observe the maximum weight allowance of the carrier fitted to your bicycle. Note: Sometimes the maximum capacity of the panniers fixing system can exceed the maximum capacity of the carrier. DO NOT exceed the maximum capacity of the carrier! Note, that the use of panniers will significantly influence the handling properties of your bicycle.

Attention: As abrasion cannot be ruled out, we recommend that all points where the mounting system contacts the bicycle rack or frame be protected by scratch protection film.

Note: For reaching protection standard IP53 (5=dust protected, 3=protected against splash water coming 60° to the vertical) the roll closure must be entirely closed.
